

Drug-Coated Balloons Market Growth Analysis With Investment Opportunities For 2024-2033

The Business Research Company's Drug-Coated Balloons Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LANDON, GREATER LONDON, UK,
August 22, 2024 /EINPresswire.com/ --

The drug-coated balloons market has experienced robust growth in recent years, expanding from \$0.95 billion in

2023 to \$1.1 billion in 2024 at a compound annual growth rate (CAGR) of 16.3%. The growth in the historic period can be attributed to increased cardiovascular disease burden, demand for minimally invasive procedures, prevalence of peripheral artery disease (pad), reducing restenosis rates, advancements in interventional cardiology.

Growth Driver Of The Drug-Coated Balloons Market

The rise in the prevalence of coronary artery disease is expected to propel the growth of the drug-coated balloons market going forward. Coronary artery disease (CAD) is a medical condition defined by the narrowing or obstruction of the coronary arteries, that feed blood to the heart muscle, leading to heart attacks. The drug-coated balloon is a medical device used in

the treatment of coronary artery disease. The drug is released into the artery during the procedure to help prevent restenosis, which is the re-narrowing of the artery after angioplasty.
