

Vasodilators Market Report 2024: Trends, Strategies, And Opportunities

*The Business Research Company's
Vasodilators Global Market Report 2024 –
Market Size, Trends, And Global Forecast
2024-2033*

LONDON, GREATER LONDON, UK,
August 22, 2024 /EINPresswire.com/ --
The global [vasodilators market](#) is
projected to grow from \$6.01 billion in
2023 to \$6.40 billion in 2024, at a

compound annual growth rate (CAGR) of 6.4%. Despite the challenges posed by lifestyle changes and an aging population, the market is anticipated to reach \$8.22 billion by 2028, driven by the rising prevalence of cardiovascular diseases and the increasing adoption of advanced medical technologies.

Rising Cardiovascular Diseases Propel Vasodilator Market Growth

The rising prevalence of cardiovascular diseases is a significant factor contributing to the growth of the vasodilators market. Cardiovascular diseases, which include conditions such as coronary artery disease, heart failure, and stroke, are often linked to hypertension and other risk factors. The increasing prevalence of these

diseases is driven by sedentary lifestyles, poor dietary habits, obesity, tobacco use, and aging populations. Vasodilators play a critical role in managing these conditions by relaxing blood vessels, reducing blood pressure, and improving blood flow. For example, in May 2024, the Centers for Disease Control and Prevention reported that coronary artery disease was responsible for 375,476 deaths in 2021, with 1 in 20 adults aged 20 and older affected by the condition. Therefore, the growing incidence of cardiovascular diseases is driving the growth of the vasodilators market.
