Definition:

A dance machine is a device or system that uses mechanical means to create dance or movement patterns. It frequently consists of several motors, sensors, and programming algorithms that are combined to create a variety of dancing patterns. The entertainment industry, which includes amusement parks, arcades, dance clubs, and even home entertainment systems, is where dance machines are most frequently found. The dance machine was introduced in Japan in 1998 and later spread to Taiwan. In mainland China, the dancing machine is still in the process of development. The earliest dance machine is called Dance Dance Revolution or DDR. This is a music rhythm type of game, and the most significant difference from traditional video games, is the use of traditional video games with a remote control bar or four-button handle, and a dance machine is to use the player's feet to complete the game.
