

Global Beta Blockers Market Size, Share And Growth Analysis For 2024-2033

The Business Research Company has updated all its market reports with the latest information for the year 2024, projecting trends and forecasts until 2033

LONDON, GREATER LONDON, UK,
August 23, 2024 /EINPresswire.com/ --

The [global beta blockers market](#) is poised for strong growth, expanding from \$9.16 billion in 2023 to \$9.78

billion in 2024, at a CAGR of 6.8%. The market's expansion is driven by the management of hypertension, treatment of cardiovascular diseases, post-myocardial infarction care, migraine prophylaxis, and the management of anxiety and tremors. The market is expected to reach \$12.28 billion by 2028, growing at a CAGR of 5.9%, driven by the rising prevalence of

cardiovascular diseases, expanded applications in heart failure, and the growing focus on combination therapies and hypertension guidelines.

Increasing Incidence of Cardiovascular Diseases Drives Growth in the Beta Blockers Market

The rise in cardiovascular diseases (CVDs) is a major factor driving the growth of the beta blockers market. CVDs,

which include a variety of disorders affecting the heart and blood vessels, have seen increased incidence due to unhealthy diets, poor lifestyle choices, lack of exercise, tobacco use, and obesity. Beta blockers play a crucial role in managing these conditions by exerting beneficial effects on the heart and blood vessels. For example, according to the National Health Survey 2020-21 by the Australian Bureau of Statistics, around 571,000 Australians aged 18 and over (2.9% of the adult population) were living with coronary heart disease (CHD) in 2020-21. The rising incidence of such diseases is expected to fuel the beta blockers market's growth.
