Green Buildings Fuel Growth in the Building and  
Construction Glass Market

The development of green buildings is a significant factor contributing to the growth of the building and construction glass market. Green buildings focus on environmental responsibility, resource efficiency, and the use of sustainable materials, where building and construction glass plays a pivotal role. This glass enhances energy efficiency by reducing consumption and costs. According to

the US Green Building Council, over 36,835 projects totaling 4.63 billion gross square feet received LEED certification between 2017 and 2021. The trend is expected to continue, driving demand for building and construction glass.

Explore comprehensive insights into the global building and construction glass market with a detailed sample report:

## Key Players and Market Trends

Key players such as AGC Inc., Guardian Industries, and Saint-Gobain S.A. are focusing on product innovations to meet the growing demand for energy-efficient and aesthetically appealing glass. For instance, Vitro Architectural Glass launched Solarban R77 in February 2021, a low-emissivity glass that offers solar control with a silver-blue aesthetic, catering to increasingly stringent building codes.

## Segments:

Type: Low-E Glass, Special Glass

Manufacturing Process: Float Glass Process, Rolled Or Sheet Process

Chemical Composition: Soda-Lime, Potash-Lime, Potash-Lead

Application: Residential, Non-Residential

## Geographical Insights: Asia-Pacific Leading the Market

Asia-Pacific was the largest region in the building and construction glass market in 2023 and is expected to continue leading during the forecast period. The region's growth is fueled by rapid urbanization, infrastructure development, and stringent energy efficiency regulations.
