

Global Canned Seafood Market Size, Share And Growth Analysis For 2024-2033

The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033

LONDON, GREATER LONDON , UK,
August 23, 2024 /EINPresswire.com/ --
The global canned seafood market is projected to grow from \$33.4 billion in 2023 to \$35.27 billion in 2024, at a

compound annual growth rate (CAGR) of 5.6%. This growth trajectory reflects a steady increase in consumer demand and market expansion, driven by factors such as globalization of cuisine and rising health awareness. The market is anticipated to reach \$44.26 billion by 2028, with a CAGR of 5.8%, propelled by sustainability practices and innovations in the canned seafood sector.

Heart Disease and Diabetes Concerns Fuel Canned Seafood Market

The rise in health issues such as heart disease and diabetes is a significant factor driving the growth of the canned seafood market. Canned seafood, rich in omega-3 fatty acids, provides numerous health benefits including

anti-inflammatory properties and reduced risk of chronic diseases. According to the British Heart Foundation, one in eight men and one in fourteen women in the UK died from coronary heart disease in 2023. Additionally, the International Diabetes Federation reported that approximately 537 million adults globally suffer from diabetes. These health concerns are leading consumers to seek out canned seafood as a nutritious dietary option.
