Chronic Spontaneous Urticaria Market Definition

Chronic spontaneous urticaria (CSU) is a skin condition characterized by the recurrent appearance of hives (raised, red, itchy welts) and angioedema (swelling) lasting for more than six weeks, without an identifiable external trigger. The exact cause of CSU is often unknown, but it may involve an autoimmune component where the body's immune system mistakenly attacks healthy skin cells. Treatment focuses on symptom management, primarily using antihistamines and, in more severe cases, other medications such as biologics.
