Increase In Incidences Of Spinal Disorders Fuels Growth In The Minimally Invasive Spine Surgery Devices Market
The surge in spinal disorders is a crucial driver for the growth of the minimally invasive spine surgery devices market. Conditions such as herniated discs, spinal stenosis, and scoliosis are becoming more prevalent due to factors like aging populations, sedentary lifestyles, and

degenerative changes in spinal structures. Minimally invasive spine surgery devices offer significant advantages, including reduced tissue damage, shorter recovery times, and minimized post-operative pain compared to traditional open surgeries. According to the National Spinal Cord Injury Statistical Center, around 305,000 individuals in the United States are estimated to have traumatic spinal cord injury in 2024, up from 302,000 in 2023, highlighting the increasing demand for effective treatment solutions.

Key Players and Market Trends

Key players such as Stryker Corporation, Boston Scientific Corporation, and Zimmer Biomet Holdings Inc. are leading the charge in advancing minimally invasive spine surgery devices. Companies are focusing on innovations like customizable retractor systems to enhance surgical precision and improve patient outcomes. For example, Orthofix Medical Inc. launched the Lattus Lateral Access System and the Fathom Pedicle-Based Retractor System in April 2023, featuring advanced customization and enhanced visibility for better surgical results.

Segments

- By Product: Cervical Fusion Devices, Spine Biologics, Vertebral Compression Fracture Treatment Devices, Non-fusion Devices, Spine Bone Stimulators, Spinal Decompression Devices
- By Treatment: Disk Herniation, Degenerative Spinal Disease, Spinal Stenosis, Other Treatments
- By Procedure: Discectomy, Laminotomy, Foraminotomy, Facetectomy, Corpectomy
- By Application: Fusion Surgery, Non-Fusion Surgery
- By End User: Ambulatory Surgical Centers (ASCs), Hospitals

Geographical Insights: North America Leading the Market

North America was the largest region in the minimally invasive spine surgery devices market in 2023 and is expected to maintain its leading position. The report provides detailed insights into regional dynamics, market trends, and growth opportunities across different geographical areas.

[Minimally Invasive Spine Surgery Devices Global Market Report 2024](#) from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

[The Minimally Invasive Spine Surgery Devices Global Market Report 2024](#) by The Business Research Company is the most comprehensive report that provides insights on minimally invasive spine surgery devices market size, minimally invasive spine surgery devices market drivers and trends, minimally invasive spine surgery devices market major players, minimally invasive spine surgery devices competitors' revenues, minimally invasive spine surgery devices

market positioning, and minimally invasive spine surgery devices market growth across geographies. The minimally invasive spine surgery devices market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
