

RightData Becomes an Official Databricks Technology Partner

ATLANTA, GEORGIA, UNITED STATES, August 28, 2024 /EINPresswire.com/ -- RightData, a leading data products platform specializing in data governance, data democratization, no-code data pipelines, and augmented data quality assessment, is proud to announce its new status as an official Databricks Technology Partner. This partnership marks a significant milestone in RightData's journey to simplify modern data management for enterprises across the globe.

Empowering Enterprises with Seamless Data Integration and Quality Assurance

As a Databricks Technology Partner, RightData will integrate its powerful data solutions with Databricks Lakehouse Platform, offering customers enhanced capabilities for data processing, governance, and analytics. This collaboration enables organizations to leverage the combined strengths of RightData's [DataTrust](#), DataFactory, and [DataMarket](#) solutions alongside Databricks' unified data platform.

"This partnership with Databricks represents a significant step forward for RightData," said Vasu Sattenapalli, CEO of RightData. "We are committed to providing our customers with the best tools to manage, govern, and democratize their data. By combining RightData's innovative solutions with Databricks' robust platform, we can help organizations accelerate their data-driven strategies, foster innovation, and achieve digital transformation."

Enhancing Data Discovery and Access with DataMarket

RightData's DataMarket solution will now offer enhanced integration with Databricks' Unity Catalog, providing a seamless experience for data discovery and access across organizations.

"Our integration with Databricks Unity Catalog allows us to augment data discovery and

management capabilities within DataMarket," said Harish Raju, Head of Data Products at RightData. "By leveraging Databricks' lakehouse architecture, DataMarket enables users to easily find, explore, and utilize data products across various domains, breaking down silos and promoting a unified approach to data access and utilization."

Ensuring Data Integrity and Supporting Platform Modernization with DataTrust and DataFactory

RightData's suite of solutions, including DataTrust and DataFactory, are designed to leverage Databricks' processing engine to enhance data governance and quality assurance across the enterprise.

"With DataTrust and DataFactory, we are uniquely positioned to support Databricks customers in their Data & Platform modernization journey," said Siva, CTO at RightData. "Our solutions ensure ongoing data integrity, provide robust integrity audits, and facilitate comprehensive data certification processes. This partnership allows us to deliver enhanced value to our customers, ensuring their data remains reliable, accurate, and ready for advanced analytics within the Databricks environment."

About RightData

RightData is at the forefront of the data management industry, providing cutting-edge tools that support data governance, data democratization, and data quality. With its no-code data pipelines and augmented data quality assessment, RightData empowers businesses to harness their data assets fully, drive better decision-making, and achieve strategic objectives.

About Databricks

Databricks is the data and AI company that innovates the data lakehouse paradigm, unifying data, analytics, and AI on one platform. Databricks' lakehouse platform simplifies data workflows and accelerates innovation by providing a single system for all data workloads, from streaming analytics to business intelligence.
