Recycled White Lined Chipboard Global
Market Report 2024 – Market Size,
Trends, And Forecast 2024-2033*

LONDON, GREATER LONDON, UK,
August 30, 2024 /EINPresswire.com/ --

The recycled white lined chipboard market has shown impressive growth, increasing from \$0.93 billion in 2023 to

\$1.04 billion in 2024, reflecting a compound annual growth rate (CAGR) of 11.7%. This growth is driven by the demand for high-quality, eco-friendly products, sustainable packaging solutions, the rise of e-commerce, government recycling initiatives, and increased awareness of the benefits of recycled materials. The market is expected to further expand to \$1.82 billion by 2028,

with a CAGR of 15.1%. This growth is attributed to heightened environmental awareness, a shift towards sustainable packaging in the food and beverage industry, and increasing demand from various end-use sectors.

Surge in Food and Beverage Industry Demand

The food and beverage industry's growing demand for recycled white-lined chipboard is significantly driving

market growth. This sector seeks sustainable, cost-effective packaging solutions that align with environmental goals and consumer preferences for eco-friendly products. For instance, sales of food and non-alcoholic drinks in Australia increased to 15.1 million tons in 2021–2022, reflecting the rising demand for packaging solutions that support sustainability efforts. Recycled white-lined chipboard meets these needs by offering a versatile, sustainable packaging option.

Recycled White Lined Chipboard Market Report 2024
– Market Size, Trends, And Forecast 2024-2033

Leading players in the recycled white lined chipboard market include WestRock Company, International Paper Company, Smurfit Kappa Group, and Mondi Group. These companies are focusing on innovations to meet the rising demand for sustainable packaging solutions. For example, Anmet's launch of chipboard panels made from recycled end-of-life (EOL) composites showcases advancements in sustainable materials. These panels, produced from wind turbine blades and other composites, offer high performance without the need for a drying process, thus reducing wood consumption.

Market Segmentation

- By Type: Waste Paper Type, Recycled Fibers Type
- By Thickness: Thin Board, Medium Board, Thick Board
- By Application: Cereals and Dry Foods, Frozen or Chilled Food, Shoes, Toys, Industrial, Car Spares, Electronics, Cosmetics, Household Goods, Other Applications

Recycled white-lined chipboard (RWLC) is used in various applications due to its high-quality surface and sustainability. The main types include waste paper and recycled fibers, with thicknesses ranging from thin to thick boards. These chipboards are used in packaging for cereals, frozen foods, industrial products, and more.

Geographical Insights: Asia-Pacific Leads The Market

Asia-Pacific was the largest region in the recycled white lined chipboard market in 2023, reflecting its significant role in the global supply chain and growing demand for sustainable packaging solutions.
