[Single Vision Lenses Market Definition](#)

Single vision lenses are corrective lenses designed to correct vision at a single distance, either for nearsightedness (myopia) or farsightedness (hyperopia). Unlike multifocal lenses, they have uniform optical power throughout, offering clear vision either for close-up tasks or distance vision, depending on the prescription. These lenses are commonly used in eyeglasses for everyday wear and can be made from various materials, including plastic and glass, to accommodate different needs for durability, weight, and optical clarity.
