Report. Historical data from 2011 to 2020 forecast data from 2021-2027.

Key findings of the report include:

The pet furniture industry has witnessed a consistent growth in past few years. Increase in number of employed families, growth in awareness about rise in health care expenditure and well-established health care facilities, increase in disposable income, and improved online retailing are some of the major factors that supplement growth of the industry. Currently, North

America is the highest revenue-generating region, owing to higher per capita as well as wide range of varieties. The pet furniture market is in its nascent stage in emerging countries, such as India and China. However, it is expected to witness notable growth in Asia-Pacific during the forecast period, owing to increase in usage of eco-friendly pet related furniture and customized pet furniture. Pet furniture with advanced features, such as smart beds are anticipated to witness greater adoption in coming years, owing to innovative product launches and effective marketing strategies by leading players. Several companies have launched pet furniture that comprise features such as natural pet bed and smart beds.
