

# EXPANSIA Receives DoD Nunn-Perry Award for Advanced Agile Software Development in Collaboration with Mentor CACI

*EXPANSIA has Experienced Significant Growth through CACI Partnership, Including a 36% Increase in Employees and Securing \$33 Million in DoD Prime Contracts*

NASHUA, NH, UNITED STATES, August 30, 2024 /EINPresswire.com/ --

[EXPANSIA](#), a service-disabled, veteran-owned small business specializing in rapidly delivering government and commercial technologies, is honored to receive the prestigious [Nunn-Perry Award](#) alongside its mentor, [CACI International Inc](#) (NYSE: CACI), for excellence in the Department of Defense (DoD) Mentor-Protégé Program. This recognition highlights its successful collaboration with CACI, focusing on Agile software development, secure cloud infrastructures, and digital materiel management.

“Our partnership with CACI has been instrumental in refining our business model and bringing innovative solutions to the DoD,” said EXPANSIA Chief People Officer, Tynel Jarnagin. “With their support, we’ve been able to position ourselves as a prime contractor, delivering advanced capabilities that benefit the warfighter and strengthen national security.”

Since the inception of their Mentor-Protégé Agreement (MPA) in 2018, EXPANSIA and CACI have achieved sustained success, particularly in supporting U.S. Air Force (USAF) programs. Their joint efforts have focused on Agile software development and leveraging additive manufacturing technologies to enhance warfighter capabilities and address critical supply chain challenges.

Through this partnership, EXPANSIA has experienced significant growth, including a 36% increase in employees and securing over \$33 million in DoD contracts as a prime contractor. Its work has

expanded the USAF's industrial base, enabling rapid innovation, global logistics support, and improved quality-of-life services for warfighters.

"CACI's mentorship has been invaluable in our journey," added Jarnagin. "We are grateful for the DoD's commitment to the Mentor-Protégé Program, which has allowed us and other small businesses to thrive and deliver critical capabilities to military end users worldwide."

EXPANSIA also benefited from strategic planning and Capability Maturity Model Integration (CMMI) and International Organization for Standardization (ISO) implementation services provided by CACI in partnership with Morgan State University. These initiatives have further enhanced its performance and positioned us for continued success.

As EXPANSIA celebrates its 10th anniversary in 2024, it remains dedicated to driving digital adoption, innovation, and efficiency in service of the warfighter. The company looks forward to continuing its mission of integrating, automating, and modernizing sustainment through technology-enabled delivery models, digital engineering, and cloud-ready solutions.

CACI also partnered with Morgan State University, a public historically Black research university in Baltimore, Maryland, to provide annual strategic planning to EXPANSIA as well as Capability Maturity Model Integration (CMMI) and International Organization for Standardization (ISO) implementation services to improve their performance.

The DoD Mentor Protégé Program was established in 1990 in response to concerns raised by DoD prime contractors regarding their inability to meet Small Disadvantaged Business (SDB) subcontracting goals. The award is named for the contributions of Senator Sam Nunn and former Secretary of Defense William Perry, both of whom played critical roles in the implementation of the DoD Mentor Protégé Program. The program has since expanded, providing developmental assistance to Women-Owned Small Businesses, Service-Disabled Veteran-Owned Small Businesses, and others.
