## Growth Driver Of The Medical Disinfectant Wipes Market

The increasing prevalence of hospital acquired infections are expected to propel the growth of hospital acquired infections going forward. Hospital-acquired infections refer to the infections that patients acquire while receiving medical treatment or care within a healthcare facility, such as a hospital, clinic, nursing home, or other healthcare setting. Increased demand for preventive

products, regulatory requirements, patient safety concerns, and heightened awareness of hygiene contribute to the market's expansion. Additionally, HAIs during health crises and the cost-efficiency of preventive measures further underscore the significance of medical disinfectant wipes.
