

# Amezquita Family Triumphs Over Tragedy and Finds Success in Space Industry

*Great story for Hispanic History Month*

TORRANCE, CALIFORNIA, UNITED STATES, September 2, 2024

[/EINPresswire.com/](#) -- The [Amezquita](#) Family's story is one of resilience and triumph in the face of adversity. In March 2019, the family's life changed irrevocably when Ramiro Amezquita, the family patriarch, was tragically injured while working for a glass company.

On a rainy day in March 2019, Ramiro was delivering a large, supposedly unbreakable piece of glass to an Orange County business. Despite the glass's design, the rainy conditions led to a devastating accident. The glass shattered and punctured Ramiro's throat. Despite immediate medical attention and surgery, Ramiro passed away that night, leaving his wife Maria, their four children—Edgar, Abraham, Ramiro Jr.—and sister Briana to cope with the profound loss.

In the wake of this tragedy, the eldest brother, Edgar Amezquita, stepped up as the family's primary support. With unwavering determination, he and his siblings—Abraham, Ramiro Jr., and their sister Briana—have emerged stronger and more unified.

Today, the Amezquita family has achieved remarkable success in the aerospace industry. All three brothers are making significant contributions at [Scorpius Space Launch Company](#) (SSLC) in Torrance, CA. Edgar, 30, is a Manufacturing Process Engineer at SSLC, having earned his degree in Mechanical Engineering from the University of California, Irvine in 2017. Abraham, 28, holds an associate degree from Long Beach City College and has been with SSLC since before its recent successful lunar landing. Ramiro Jr., the youngest at 18, joined SSLC just three months ago. Their sister Briana, 25, a Cal State Fullerton Public Health graduate, is currently employed at a private school.

The Amezquita Family in Happier Times.

The Amezquita brothers' dedication and expertise have been instrumental in SSLC's achievements. Edgar's leadership and emphasis on fostering a tight-knit, skilled team reflect the close bonds and values he learned from his family. It also blends perfectly with SSLC's innovation-culture that Markus Rufer, the company's CEO, promotes by maximizing the full range of ideas and approaches his widely diverse team members generate, resulting in industry leading technologies and products the company is known for.

The Amezquita family is now ready to share their inspiring journey publicly for the first time. For further insights into their story and to discuss the Amezquita brothers' contributions to the space industry.
