

Mobile Imaging Market to reach \$53,847.8 million by 2030 registering a CAGR of 6.50% from 2021 to 2030

PORTLAND, OREGON, UNITED STATES, September 2, 2024 /EINPresswire.com/ -- According to the report, the global [mobile imaging industry](#) generated \$29.38 billion in 2020, and is estimated to reach \$53.84 billion by 2030, witnessing a CAGR of 6.5% from 2021 to 2030.

The study analyzes the important strategies, drivers, competition, market dynamics, size, and important investment regions.

Key Takeaways:

The X-ray segment to maintain its leadership position during the forecast period.

The hospital & clinic segment to maintain its dominance during the forecast period

North America to continue its lead in terms of revenue by 2030.

Major Factors Driving the Growth of Mobile Imaging Market:

The following are some of the major factors driving the growth of the mobile imaging market:

Increasing prevalence of chronic diseases: The prevalence of chronic diseases such as cancer, cardiovascular disease, and diabetes is on the rise globally. Chronic diseases often require regular imaging tests to monitor disease progression and to assess the effectiveness of treatment. Mobile imaging can provide convenient and accessible imaging services to patients with chronic diseases, regardless of their location.

Aging population: The global population is aging rapidly. Older adults are more likely to develop chronic diseases and to require regular imaging tests. Mobile imaging can help to meet the growing demand for imaging services from the aging population.

Technological advancements: Technological advancements are leading to the development of smaller, lighter, and more portable imaging devices. This is making it possible to provide mobile

imaging services to patients in a variety of settings, such as hospitals, clinics, and nursing homes.

Rising demand for non-invasive imaging: There is a growing demand for non-invasive imaging methods, as they are more convenient and less painful for patients. Mobile imaging can provide a variety of non-invasive imaging services, such as X-rays, ultrasound, and MRI.

Market Segmentation:

By SERVICE TYPE:

- X-ray
- CT scan
- Ultrasound
- MRI
- Mammography
- Nuclear Imaging
- Others

By PATIENT TYPE:

- Adult
- Pediatric

By FACILITY:

- Hospitals & clinics
- Home healthcare
- Others

By Region:

- North America (U.S., Canada, Mexico)
- Europe (France, Germany, Italy, Spain, UK, Russia, Rest of Europe)
- Asia-Pacific (China, Japan, India, South Korea, Australia, Thailand, Malaysia, Indonesia, Rest of Asia-Pacific)
- LAMEA (Brazil, South Africa, Saudi Arabia, UAE, Argentina, Rest of LAMEA)

Regional Growth Dynamics:

North America accounted for the highest market share in 2020, contributing to around two-fifths of the global mobile imaging market, and is estimated to continue its lead in terms of revenue by 2030. This is due to technological advancements, surge in demand for digitization in healthcare organizations, and increase in awareness about mobile imaging technologies in the diagnosis of various diseases. However, Asia-Pacific is expected to manifest the largest CAGR of 8.1% from 2021 to 2030. This is attributed to enhanced healthcare infrastructure, prevalence of chronic diseases, well-established presence of domestic companies, and increase in the aging population in the region.

Leading market players:

Accurate Imaging Inc.
Alliance Healthcare Services
Atlantic Medical Imaging Inc.
Cobalt Health
Front Mobile Imaging
Inhealth Group Limited
Interim Diagnostic Imaging Inc.
Insights Health Services Corp.
RadNet Inc.
Trident USA Health Services
