Growth Driver Of The Tele-Intensive Care Market

The increase in the prevalence of chronic diseases is driving the growth of the tele-intensive care market. Chronic diseases are generic terms for a large group of diseases that can affect any part of the body, which can then invade adjoining parts of the body and spread to other organs, leading to causes of death. Tele-intensive care is utilized in continuous monitoring, long-distance

device assessment and management (pacemakers, defibrillators), and chronic patient monitoring, among others.
