Growth Driver Of The Methenamine Hippurate Tablets Market

An increasing geriatric population is expected to boost the growth of the methenamine

hippurate tablets market going forward. Geriatric population refers to the population of older people of 60 years and above. Geriatric patients are more vulnerable to urinary tract infections due to a variety of factors such as decreased urine flow, an enlarged prostate, or kidney stones, thus methenamine hippurate tablets are required to treat these conditions. For instance, according to the World Health Organization, a Switzerland-based specialized agency of the United Nations responsible for international public health, one in six individuals on the planet will be 60 or older by 2030.
