Growth Driver of The Viscosupplementation Market

The rise in the prevalence of osteoarthritis is expected to propel the growth of the viscosupplementation market going forward. Osteoarthritis refers to a degenerative joint disease, also known as a common form of arthritis, in which the joints start to break down,

mostly in the hips, knees, and hands. Viscosupplementation treatment helps to reduce pain and facilitate smooth bone movement by injecting hyaluronic acid straight into the bone joints which enables a reduction in pain and improves the bone's functionality.
