Growth Driver of The Thrombophilia Market

An increase in the elderly population is expected to propel the growth of the thrombophilia market going forward. The elderly population refers to those aged 65 and up, with the

proportion of the dependent population determined as the total elderly and youth population expressed as a ratio of the total population. Thrombophilic risk factors are common in elderly adults and allow for the identification of a population at risk for poor clinical outcomes, hence, the rise in the elderly population will boost the market as it creates demand for thrombophilia drugs.
