Growth Driver of The Audiology Devices Market

The growing elderly population is expected to propel the growth of the audiology devices market going forward. The elderly population refers to those aged 65 and up, with the proportion of the dependent population determined as the total elderly and youth population expressed as a ratio of the total population. Audiology devices are essential tools for improving the quality of life for the elderly population, who are disproportionately affected by hearing loss. These devices can

help individuals with hearing loss better communicate, participate in social activities, and maintain their independence.
