Growth Driver Of The Surgical Dressing Market

The rising number of surgeries is expected to propel the growth of the surgical dressing market  
going forward. Surgeries refer to the branch of medicine that is concerned with treating disease,  
and injuries, by manual or operative procedures. With the rise in aging population and the rise in  
incidence of chronic diseases, the number of surgical procedures being performed are also

Market Size, Trends, And Global Forecast 2024-2033

increasing. Surgical dressings are an essential component of post-operative wound care and play a critical role in preventing infection and promoting healing. They are used to cover and protect surgical incisions, absorb excess fluid, and provide a barrier against bacteria and other contaminants. As a result, the rising number of surgeries increases the demand for the surgical dressing market.
