Growth Driver of The Animal Derivatives Market

The rising urbanization is expected to propel the growth of the animal derivatives market going forward. Urbanization refers to the increasing population concentration in urban areas, including the growth of cities and the expansion of urban land areas. Urbanization is linked to an increased demand for animal proteins such as meat, eggs, and dairy products. As urban

populations grow, there is a higher consumption of animal-derived protein sources due to factors like higher income levels and access to a variety of food products.
