Growth Driver Of The Chronic Rhinosinusitis With Nasal Polyps Market

The increasing prevalence of respiratory diseases is expected to propel the growth of chronic rhinosinusitis with the nasal polyps market going forward. Respiratory diseases encompass a broad range of conditions that affect the respiratory system, including the lungs and airways. A complex interplay of factors, including air pollution, smoking, climate change, infections, occupational exposures, and allergies, drives the rising cases of respiratory diseases. With more people experiencing conditions such as asthma and chronic obstructive pulmonary disease (COPD), the incidence of associated conditions such as CRSwNP also rises, resulting in greater demand for diagnostic tools, treatments, and surgical interventions.
