The B2C payment market refers to all products, services, and infrastructure enabling monetary transactions between businesses and individual consumers. It encompasses the ecosystem of payment instruments, networks, processors, and other intermediaries that facilitate retail customer purchases, bill payments, peer-to-peer transfers, and other flows of funds from consumers to businesses.

Credit and debit cards remain the most ubiquitous payment instrument globally given the vast acceptance network driven by Visa, Mastercard, Amex and other schemes. However, B2C payment market growth is expected to moderate on two fronts user fatigue from complex reward schemes and added costs for merchants, along with technological innovation in alternate digital payment platforms. Contactless tap-and-go card payment adoption on the other hand promises sustained upside focused on transit and retail P2P use-cases.

Growth in the e-commerce industry, rise in consumer demand for digital payments, and technological advancements such as digital wallets and contactless payments driving innovation boost the growth of the global B2C payment market. In addition, factors such as increased adoption of mobile payments and online banking have positively impacted the growth of the market. However, cybersecurity threats, fraud risks, and regulatory uncertainty are expected to hamper the market growth. On the contrary, advancing biometric authentication technologies

such as facial recognition and fingerprints can enhance security and blockchain-based solutions can enable faster cross-border transactions. Lower costs are expected to offer remunerative opportunities for the expansion of the market during the forecast period. Each of these factors is projected to have a definite impact on the growth of the B2C payment market.

Global B2C Payment Market Outlook (2023-2032) (Global B2C Payment Market, Global B2C Payment Market, Global B2C Payment Market) @ <https://bit.ly/3UD4j7j>

Impact of Russia-Ukraine War

The lockdowns and social distancing measures implemented globally led to a sharp decline in in-store shopping and accelerated the shift towards e-commerce.

Contactless payments also surged as consumers sought to avoid touching surfaces while transacting. Payment service providers promoted contactless cards and mobile wallets, which further accelerated adoption.

Initiatives by governments and industry players in response to pandemic-driven demands.

The cards segment to maintain its leadership status throughout the forecast period.

By type, the cards segment held the highest market share in 2022, accounting for more than half of the global B2C payment market revenue, owing to the high penetration of credit and debit cards. However, the digital wallet segment is projected to manifest the highest CAGR of 14.5% from 2023 to 2032, owing to a surge in the application of digital wallets in emerging markets.

The BFSI segment to maintain its leadership status throughout the forecast period

By industry vertical, the BFSI segment held the highest market share in 2022, accounting for nearly one-fourth of the global B2C payment market revenue. This is owing to increased B2C product offerings from major banking companies. However, the healthcare segment is projected to manifest the highest CAGR of 17.1% from 2023 to 2032, owing to increased digitalization in healthcare.

Global B2C Payment Market Outlook (2023-2032) (Global B2C Payment Market, Global B2C Payment Market, Global B2C Payment Market) & Global B2C Payment Market:
