## Growth Driver Of The Alpha Methyldopa Market

The increasing hypertension cases are expected to propel the growth of the alpha methyldopa market going forward. Hypertension, commonly known as high blood pressure, is a medical condition where the force of the blood against the artery walls is consistently too high. The rise in hypertension cases is due to poor diet, lack of physical activity, obesity, and increased stress levels. Alpha methyldopa is used to treat hypertension by decreasing certain chemicals in the blood, which allows blood vessels to relax and widen, reducing blood pressure.
