

Gastric Ulcers Market Size, Share, Revenue, Trends, and Drivers For 2024-2033

*Gastric Ulcers Global Market Report 2024
– Market Size, Trends, And Global
Forecast 2024-2033*

LONDON, GREATER LONDON, UNITED KINGDOM, September 6, 2024 /EINPresswire.com/ -- The [gastric ulcers market](#) has experienced robust growth in recent years, expanding from \$4.07 billion in 2023 to \$4.29 billion in 2024 at a compound annual growth rate (CAGR) of 5.3%. The growth in the historic period can be attributed to the rising prevalence of helicobacter pylori infections, increasing use of nonsteroidal anti-inflammatory drugs (NSAIDs), growing geriatric population globally, rising awareness campaigns for gastric ulcer prevention and increasing incidence of stress-related disorders.

What Is The Estimated Market Size Of The Global Gastric Ulcers Market And Its Annual Growth Rate?

The gastric ulcers market size is expected to see strong growth in the next few years. It will grow to \$5.34 billion in 2028 at a compound annual growth rate (CAGR) of 5.6%.”

*The Business Research
Company*

The gastric ulcers market is projected to continue its strong growth, reaching \$5.34 billion in 2028 at a compound annual growth rate (CAGR) of 5.6%. The growth in the forecast period can be attributed to improvements in diagnostic techniques, adoption of unhealthy dietary habits, advancements in treatment options, including proton pump inhibitors (PPIs), aging population contributing to higher disease burden and expansion of healthcare infrastructure in emerging markets.

Growth Driver Of The Gastric Ulcers Market

The increasing geriatric population is expected to propel the growth of the gastric ulcers market going forward. The geriatric population refers to individuals typically aged 65 years and older, characterized by specific health considerations related to aging. The increase in the geriatric population is due to advancements in healthcare, leading to longer life expectancy and declining birth rates in many regions globally. Gastric ulcers are common in the geriatric population due to increased use of NSAIDs and decreased mucosal protection, often leading to higher risks of complications.

South America, Middle East, Africa.

[Gastric Ulcers Market Definition](#)

Gastric ulcers, also known as peptic ulcers, are open sores on the stomach's inner lining due to the corrosive action of stomach acid. They often cause burning stomach pain, indigestion, and discomfort. Gastric ulcers are usually caused by an imbalance between stomach acid, an enzyme called pepsin, and the protective mucosal barrier lining the stomach and duodenum.
