

Anker Solix X1 Energy Storage Coming to UK/EU: Delivers Energy Independence with Iconic Design & Flexible Power Options

BELLEVUE,, WA, UNITED STATES, September 5, 2024 /EINPresswire.com/ -- At IFA 2024, Anker Innovations announced they will be bringing its popular Anker SOLIX X1 home energy storage system to Europe and the UK later this year. Following its successful launch in the United States earlier this year, the Anker SOLIX X1 will soon offer homeowners across the region greater flexibility in storing and utilizing solar-generated power.

Anker Solix Logo

Amid rising energy costs, the Anker SOLIX X1 combines a sleek, iconic design with robust performance to support the growing consumer movement toward energy independence. The SOLIX X1 also introduces a unique, modular approach, giving consumers greater flexibility in building a customized energy storage system to meet their specific needs.

Our launch of the SOLIX X1 to the UK and in Europe marks a significant milestone in our mission to provide more sustainable and reliable energy solutions globally."

Shaun Xiong, General Manager of Anker and Anker SOLIX

"Our launch of the SOLIX X1 to the UK and in Europe marks a significant milestone in our mission to provide more sustainable and reliable energy solutions globally," said Shaun Xiong, General Manager of Anker and Anker SOLIX. "With energy costs escalating, the SOLIX X1 gives homeowners true energy independence by ensuring they have power in any situation."

PRODUCT HIGHLIGHTS

- Compact and Modular Design: The Anker SOLIX X1 features a sleek and modular design that integrates

seamlessly into any home decor. With a thickness of only 15 cm, it is 40% thinner than most home energy solutions, offering an aesthetically pleasing and intuitive experience with its

interactive screen and lighting.

- **More Power. More Flexibility:** The SOLIX X1's modular design allows users to customize their systems with capacities ranging between 5 kWh and 180 kWh and power outputs between 3.68 kW and 72 kW, catering to a wide range of energy needs.

- **Innovative Energy Optimization:** Each battery pack operates independently during charging and discharging, increasing energy efficiency by and supporting up to 2000 kWh more power than traditional home battery systems. [1]

- **Seamless Transition:** The SOLIX X1 ensures uninterrupted power during blackouts by switching to off-grid mode in less than 10 milliseconds. It continues to work with existing photovoltaic (PV) panels, maintaining a stable power supply to the home.

- **Smart App Controls:** Effortlessly manage and monitor the X1 with the Anker app. Users can control the device remotely and optimize power usage by analyzing detailed data.

- **Widest Temperature Range and Built to Last:** The SOLIX X1 is designed to operate in any environment, efficiently handling temperatures from -20°C to 55°C, and features C5 corrosion protection along with IP66 certification for safe outdoor use.

- **Installation Flexibility:** The SOLIX X1's slim 15 cm flat profile can be installed indoors or outdoors, offering a space-
