

alt.ai launches “End of Work” roundtable with leaders in various fields to contribute to increasing Japan's GDP

Discussing global cutting-edge use cases for AI clones

TOKYO, JAPAN, September 5, 2024 /EINPresswire.com/ -- alt Inc. (<https://alt.ai/en/>), the Japan-based developer and distributor of Personal Artificial Intelligence (P.A.I.®) and AI clone technology (head office: Minato-ku, Tokyo; CEO: Kazutaka Yonekura), held its first "End of Work" roundtable with leading thinkers from various fields on August 1, 2024.

alt's grand vision of "liberation from unproductive labor" is closely related to the challenges facing the Japanese government and Japanese companies. We believe that Japan, one of the world's most advanced countries in terms of facing challenges, has both the need and opportunity to be a leader in creating jobs through AI clones.

As science fiction writer A.C. Clarke said, "It is only half true that humans invented technology; there is also the aspect that technology invented humans." alt believes that the development of AI technology will also promote the next evolution and expansion of humans.

End of Work - alt Roundtable on the day of the event_1

alt believes that the development of AI technology will also promote the next evolution and expansion of humans.

This roundtable was launched as a place to discuss and implement ideas for AI and DX in the business world with a global perspective. We will continue to hold the event as a place for exchange that transcends industry boundaries, with the perspective of "Are we making preparations that will be engraved in history 100 years from now?"

As we approach the realization of a society where we coexist with AI, humanity is being forced to further "evolve (expand)." alt is working with leading Japanese companies across a variety of industries to realize the "preservation and expansion of human intelligence" through its cutting-edge technology and philosophy, implementing it as a globally pioneering project and continuing to disseminate information from Japan.
