Growth Driver Of The End User Experience Monitoring (EUEM) Market

The shift towards remote work is expected to propel the growth of the user experience

It will grow from \$2.86 billion in 2023 to \$3.46 billion in 2024 at a compound annual growth rate (CAGR) of 20.9%."

The Business Research Company

monitoring (EUEM) market going forward. Remote work refers to a work setup where employees carry out their tasks outside of a conventional office setting, frequently from home or another preferred location. The fast shift to remote work is due to fewer interruptions and distractions, flexible schedules, reduced commute time, and reduced overhead costs. User experience monitoring in remote work ensures seamless performance and productivity by tracking and analyzing employee interactions with digital tools.
