Positon AI - Odin Capabilities

Odin addresses the complexities and inefficiencies inherent in M&A processes by embedding itself directly into the existing workflows of M&A professionals. Its intuitive design and robust AI capabilities provide users with powerful automation and real-time analytics, significantly enhancing operational efficiency, reducing costs, and accelerating decision-making.

“

Positon is not like other packages, it is not just a great VDR or simplifier of internal processes, it is a breakthrough idea to build & manage ready networks of opportunities in your market landscape”

Dana Hughes, Partner at Boston Consulting Group

Why Odin AI Assistance is Becoming the Preferred Choice in M&A:

Unique Architectural Design: Odin’s architecture is purpose-built to seamlessly integrate with M&A workflows, providing a cohesive and intuitive user experience. This design ensures that M&A professionals can easily adopt

the platform without the need for extensive training or workflow disruption.

Comprehensive Automation Capabilities: From drafting NDAs and purchase agreements to

managing bulk redactions and watermarking, Odin AI automates a wide range of tasks that are traditionally manual and time-consuming, freeing up valuable time for strategic decision-making.

Advanced Data Room Integration: Odin AI's deep integration with data rooms, in a ring-fencing and most secure approach, allows for efficient extraction and analysis of key information, making the due diligence process faster and more thorough. It enables professionals to access insights across the entire data room effortlessly, ensuring no critical detail is overlooked.

Real-Time Risk and Opportunity Assessment: Odin AI's advanced analytics capabilities provide synthesized, real-time risk assessments and opportunity evaluations, empowering deal teams to make better-informed decisions with greater confidence.

Automated Reporting and Enhanced Compliance: With Odin AI, firms can automatically generate real-time reports for audit purposes and ensure compliance through automated redaction of sensitive information, maintaining the highest standards of data security and confidentiality.

Improved Confidentiality and Access Management: Odin streamlines the management of permissions and access with project code names and user-specific access controls, reinforcing confidentiality and protecting sensitive deal information.

"Odin AI Assistance has been meticulously designed with the M&A professional in mind," said Rabie Zahri, CEO of Positon AI. "The industry adoption we're witnessing is a testament to Odin's seamless integration into the M&A workflows, delivering unmatched efficiencies and insight throughout the M&A process. Our users are finding that Odin not only makes their work easier but also more strategic, helping them achieve better outcomes faster."

Zaheer Ali, COO of Positon AI, added, "Odin AI Assistance is more than just a tool—it's a trusted partner in the M&A process. Its ability to provide real-time insights and streamline operations is transforming how our clients approach every stage of their deals, from origination to post-close integration. We're proud to see the industry embrace Odin's potential and excited about the future innovations we have in store."

As more firms in the M&A space discover the transformative power of Odin AI Assistance, Positon AI continues to innovate, ensuring that its solutions meet the evolving needs of the industry. With its cutting-edge design and close integration capabilities, Odin AI Assistance is set to become an indispensable tool for M&A professionals worldwide.
