

# Spirit of Stillness by Chewen Chou and Hsaio Yin Lin Wins Silver in A' Interior Design Awards

*Chewen Chou and Hsaio Yin Lin's Apartment Design Recognized for Excellence in Interior Space and Exhibition Design Category*

COMO, CO, ITALY, September 6, 2024 /EINPresswire.com/ -- The A' Design Award, a highly prestigious and well-recognized award in the field of [interior design](#), has announced Spirit of Stillness by [Chewen Chou and Hsaio Yin Lin](#) as the Silver Award winner in the Interior Space and Exhibition Design category. This distinction positions Spirit of Stillness among the most innovative and impactful designs in the interior design industry.

Spirit of Stillness exemplifies the growing trend of integrating Eastern philosophy and modern sensibilities in urban living spaces. By adhering to the tripartite Spirit philosophy, which values work, recreation, and rest equally, this design offers a practical and balanced approach to interior design that resonates with the needs of contemporary city dwellers.

The design of Spirit of Stillness is characterized by its seamless integration of traditional Eastern elements with modern aesthetics. The primary wall, constructed from recycled stone fragments, and the art wall, painted with eco-friendly Italian paints, showcase the design's commitment to sustainability without compromising on visual appeal. The subtle color palette and carefully planned layout create a serene and contemplative atmosphere, offering a peaceful refuge amidst the bustling city.

This recognition from the A' Design Award serves as a testament to Chewen Chou and Hsaio Yin Lin's dedication to pushing the boundaries of interior design. By successfully harmonizing

seemingly opposing elements such as Eastern and Western aesthetics, sustainability and luxury, and tradition and innovation, Spirit of Stillness sets a new standard for urban living spaces and is poised to inspire future trends in the industry.

Spirit of Stillness was designed by Chief Designer Chewen Chou and Chief Designer Hsaio Yin Lin, who collaborated closely to bring this innovative concept to life.
