

# Aerospace Unlimited Emerges as a Premier Purchasing Platform for Defense Parts and Supplies with Bolstered Offerings

*In an effort to meet rising global demand for dependable defense parts and supplies, ASAP Semiconductor expands offerings and services on Aerospace Unlimited.*

ANAHEIM, CA, UNITED STATES, September 6, 2024 /EINPresswire.com/ -- Aerospace Unlimited, an online purchasing platform operated by ASAP Semiconductor, has moved to solidify its position as a leading resource for defense parts and supplies through a

significant expansion of its offerings and fulfillment services. Currently, the website provides a curated selection of aerospace and aviation parts that range from structural components and hardware to electronics and board-level components, all of which meet varying specifications

and standards to accommodate civil and defense applications alike. With this announced increase of defense offerings in particular, the website aims to support defense contractors, military agencies, and related organizations alike.

“

With our expanded inventory and streamlined fulfillment options, Aerospace Unlimited is poised to be a premier resource for defense parts and supplies, ensuring operational readiness at every level.”

*Joe Faruqui*

The defense industry's demand for reliable and precise parts has surged in recent years, driven by a combination of increased global defense budgets, heightened modernization efforts, and the ongoing need to maintain existing military assets. By monitoring changing industry trends, shifting customer demand, and more, Aerospace Unlimited seeks to respond by broadening its inventory to

include a more extensive range of defense parts, NSN items, as well as parts classified under specific [Federal Supply Groups \(FSGs\)](#). For example, many defense-oriented additions have been made to accommodate industry needs for products that fall under groups like FSG 15 - Aircraft

Defense Parts and Supplies USA

and Airframe Structural Components and FSG 20 - Ship and Marine Equipment. The specific focus of sourcing and organizing parts by their [NSN \(National Stock Number\)](#) or FSG designation is to ensure that search processes are simplified and that a more diverse array of defense-related requirements can be upheld.

As ASAP Semiconductor remains an AS9120B, ISO 9001:2015, and FAA AC 00-56B accredited distributor, it has ensured that this expansion of defense-related items is carried out with proper adherence to all industry regulations and quality-control objectives. The company has established strong relationships and partnerships with manufacturers who are recognized for their commitment to quality and compliance with defense

industry standards, as well as has ensured that all stock added to Aerospace Unlimited comes from these entities and others that have been vetted as necessary. Furthermore, ASAP Semiconductor remains focused on maintaining continuous training and expansion of its quality department and practices so that every component of this announced expansion is subject to all required measures.

In addition to its extensive inventory and steadfast practices, Aerospace Unlimited has also implemented several service enhancements designed to better support its customers in the defense sector. Recognizing the importance of timely and accurate delivery, the platform will offer a range of fulfillment options on these parts with tailored services presented by staff to address the unique demands of defense operations. Whether customers require expedited shipping for urgent needs or standard delivery for routine orders, Aerospace Unlimited affirms that it will be equipped to meet these requirements with precision and efficiency in the midst of this inventory increase.

Alongside the aforementioned efforts, ASAP Semiconductor has also set a focus on the continued development of purchasing platforms like Aerospace Unlimited and others to provide optimal user experiences and streamlined search processes. For example, newly introduced stock is being added alongside increased resources for part identification, search, and comparison. Coupled with [ATA chapter catalogs](#), PMA supplement lists, aviation model collections, and more, the website hopes to provide customers with all that they need to make

Aerospace Unlimited - Leading Supplier of Aviation and Aerospace Parts

the most informed purchasing decisions while saving valuable time and resources.

As the defense industry continues to push forward, Aerospace Unlimited plans to maintain its reaffirmed commitment to adapting inventory offerings and services to meet the changing needs of customers and shifting market demand. The platform's ongoing investment in the objective of streamlining purchasing and reducing the number of sources one needs to fulfill requirements reflects its dedication to providing the highest level of support to defense contractors, military agencies, and other stakeholders in the defense sector.
