“

This documentary is a testament to the sheer bravery of submariners throughout the years as they grappled with changes in technology and the unforgiving nature of the ocean.”

Brad Osborne

This documentary examines the latest submarine technology and features new, expert analysis and insight of these disasters.

Have you ever wondered what the crew and passengers experienced, just moments away from impending death? [AMS Pictures'](#) storytellers go beyond just the history and tell the stories of these lost submarines with a personal touch, featuring interviews with surviving crew members of the U.S.S. Chopper, as they reflect on what really caused some of the world's most mysterious and tragic submarine

catastrophes.

THE INFINITE DEEP is a terrifying journey into what victims experienced when confronted with the kind of unforgiving circumstances the sea presents. Both the physical and psychological

effects of trauma—such as being trapped in pitch darkness, claustrophobia, hypothermia, fire, suffocation, drowning, even catastrophic implosion—are all examined in careful detail. Historically accurate accounts are provided by submarine historians and experts, officers, as well as individuals personally connected to the tragedies.

“It’s an important story to tell because we’ve forgotten much of the history of submarines, and we’ve learned very little from it, as evidenced by the most recent Titan tragedy.” Director Brad Osborne said. “But, beyond that, this documentary is also a testament to the sheer bravery of submariners throughout the years as they grappled with changes in technology and the unforgiving nature of the ocean.”
