The Major Players Covered in this Report: eFront (France), SimCorp (Denmark), Finastra (United

Kingdom), Avaloq (Switzerland), Objectway (Italy), T24 (United Kingdom), Minerva (Germany), Addepar (Switzerland), Envestnet (United States), Orion Advisor Solutions (United States)

Definition:

Financial Planning Software is a digital tool designed to help individuals, financial advisors, or businesses organize, manage, and plan their financial activities. The software typically allows users to assess their current financial situation, create budgets, track expenses, set financial goals, manage investments, and forecast future financial scenarios. Financial planning software can be used for personal finance management or professional financial advisory services, offering insights into cash flow, net worth, retirement planning, tax strategies, and investment portfolios.

Market Trends:

• Automated financial planning tools and robo-advisors are increasingly popular for creating investment portfolios and providing basic financial advice.

Market Drivers:

• Growing awareness of the importance of financial literacy and planning is driving more individuals and businesses to adopt financial planning software.

Market Opportunities:

• As individuals seek to take more control of their finances, there's increasing demand for user-friendly, intuitive financial planning software for personal use.

Market Challenges:

• Financial planning software often requires access to sensitive personal and financial information, making data breaches a significant concern.

Market Restraints:

• The upfront cost of some advanced financial planning software can be a barrier to entry for individuals and small businesses.
