Growth Driver Of The Vaginal Speculum Market

The increasing incidence of cervical cancer is expected to propel the growth of the vaginal speculum market going forward. Cervical cancer is a type of cancer that occurs in the cells of the cervix, which is the lower part of the uterus connecting to the vagina. The rise in cervical cancer cases can be attributed to factors such as a lack of human papillomavirus (HPV) vaccination, inadequate screening, and limited access to healthcare services. A vaginal speculum is used during cervical cancer screening (pap smear) to visualize and access the cervix for sample collection.
