

# Healing in Nature by AIA Life Designers Wins Silver in A' Architecture Awards

*AIA Life Designers' Guangzhou Royal Lee Cancer Hospital Recognized for Excellence in Architecture, Building and Structure Design*

COMO, CO, ITALY, September 9, 2024 /EINPresswire.com/ -- The A' [Design Award](#), a highly respected and well-recognized award in the field of [architecture](#) design, has announced [AIA Life Designers'](#) "Healing in Nature" as the Silver Award winner in the Architecture, Building and Structure Design category. This prestigious recognition highlights the significance of the Guangzhou Royal Lee Cancer Hospital project within the architecture industry and design community.

The Healing in Nature design showcases AIA Life Designers'

commitment to creating healthcare spaces that prioritize patient well-being and healing. By seamlessly integrating the hospital with its natural surroundings through the use of greenery in courtyards, roof gardens, and building facades, the design aligns with current trends in healthcare architecture that emphasize the therapeutic benefits of nature. This innovative approach not only enhances the patient experience but also sets a new standard for the industry.

Healing in Nature stands out for its unique "garden hospital" concept, which is applied in three dimensions: architecture, interior, and landscape design. The design takes inspiration from the natural slope of the land and local gardening traditions, creating a warm and ecological healing environment. The hospital's facade features sunshade window frames designed specifically for Guangzhou's subtropical climate, while the podium is adorned with robust gray green stone, showcasing curved lines reminiscent of a mountain or rock.

Healing in Nature

This recognition from the A' Design Award serves as motivation for AIA Life Designers to continue pushing the boundaries of healthcare architecture. The award validates the firm's approach to designing spaces that promote healing and well-being, and it inspires the team to further explore innovative solutions that positively impact patients, staff, and the wider community.

Healing in Nature was designed by a talented team of architects and designers, including Hai Yang, Simon TSOUDEROS, Dalius GUTAUSKAS, Liangping MAO, Matthieu RADET, Jiawei PAN, Zegeng CUI, Wenyan ZHAO, Sun Ruoxuan, Thomas ROGEL, Maëlle CABIO'CH, Chen Weili, and Zhang Mingming.
