

ASAP Semiconductor Aims to Bolster Its NSN Parts Distribution Capabilities with the Expansion of Just Parts Unlimited

Through expanded offerings, services, and website features, ASAP Semiconductor aims to advance NSN parts distribution capabilities through Just Parts Unlimited.

ANAHEIM, CA, UNITED STATES, September 9, 2024 /EINPresswire.com/ -- ASAP Semiconductor, a recognized company in the sourcing and distribution of aerospace, defense, and industrial components, is extending its capabilities of product fulfillment with the continued development and expansion of its website, Just Parts Unlimited. As a purchasing platform that centers its focus on the supply of National Stock Number (NSN) parts, this strategic move of increasing offerings and bolstering services highlight's the company's commitment to enhancing its distribution options to better address the requirements of customers who seek simplified purchasing processes.

The move to build upon Just Parts Unlimited's selection comes at a time when global demand for NSN parts is at an all-time high. From aerospace and defense sectors to various manufacturing processes, many

industries and applications rely on NSN parts and the wider system for ease of identification and procural. The NSN system is recognized by all NATO countries and allies, where parts that share specifications and design features can be organized under common identification codes. This

Just Parts Unlimited - Military Parts Sourcing Solution

NSN Parts Supplier For Defense

Through our commitment to expanding Just Parts Unlimited, we are better equipped to support customers with high-quality NSN parts for defense, aerospace, and industrial applications alike.”

Joe Faruqi

ensures that any confusion over manufacturer part numbers or non-standardized information is avoided for a streamlined and accurate fulfillment process.

As government entities, airlines, and corporations all continue to modernize their assets and upgrade aging equipment to remain at the forefront of operations, the need for a trusted partner in NSN parts distribution has become increasingly important. ASAP Semiconductor, through Just Parts Unlimited, aims to position itself to address these market needs more efficiently through its various efforts to further develop online features,

offerings, and fulfillment solutions.

Over the past year, ASAP Semiconductor has been forming relationships and partnerships with manufacturers, suppliers, and other entities that enable the company to source an increased selection of items for its websites. By leveraging its connections with key [NSN parts manufacturers](#) operating in various industry sectors, Just Unlimited Parts is able to be stocked with a more diverse inventory. This is accompanied by industry monitoring and data analysis, where ASAP Semiconductor plans to continually tailor inventory offerings in response to customer requirements and shifting market needs.

To accommodate the increase of NSN parts, ASAP Semiconductor is also setting a focus on managing the online catalogs of Just Parts Unlimited to simplify search processes, such as building upon its product lists that present NSN listings by their respective Federal Supply Groups (FSG) and Classes (FSC). As the first four digits of any NSN serve to identify its FSG and FSC, these product lists ensure that the search for specific electronics, aerospace, and defense items is further simplified. Similar catalogs have been created and updated for [National Item Identification Numbers \(NIIN\)](#) as well, which are the string of digits following the FSG and FSC in an NSN. As a part of product list management for this goal of expansion, all newly added parts are accompanied by many forms of data and resources.

As an AS9120B, ISO 9001:2015, and FAA AC 00-56B accredited company, ASAP Semiconductor affirms that all operations carried out through Just Parts Unlimited and all offered parts will adhere to all industry regulations and quality-control measures upheld by the company itself. With the rigorous regulations and requirements prevalent in military and aerospace sectors, all newly added [NSN \(National Stock Number\) listings](#) will also be subject to checks and verification processes that are carried out by ASAP Semiconductor’s in-house quality inspection team.

ASAP Semiconductor’s investment in the growth of Just Parts Unlimited underscores its commitment to providing dependable NSN parts distribution options for customers across the globe. The continued development of the platform with increased offerings and bolstered

services serves to ensure that customers in defense, aerospace, and industrial sectors have better access to a wide array of solutions, all backed by the quality assurance and reliability that ASAP Semiconductor is known for. This growth not only enhances the company's ability to meet current industry demands, but also positions it to support future requirements as technological advancements and modernization efforts continue to shape the landscape of defense and aerospace procurement.
