46.3%. The AI also forecasts Harris winning by 49 electoral votes, leading in key swing states such as Michigan, Pennsylvania, North Carolina, and Wisconsin, while Trump holds an edge in Arizona.

The results are shown in the attached image.

IntualityAI employs Intuitive Rationality™ to simulate human decision-making by analyzing real-time data through the lens of cognitive biases and behavior patterns. This approach enables the system to predict high-probability outcomes in complex environments, from

elections to financial markets. With a flawless track record in U.S. presidential elections since 2012, IntualityAI has also successfully predicted 81% of Congressional and State elections in line with polling, and an impressive 88% accuracy against the polls. The system continues to outperform traditional models in accuracy and response time across multiple domains.
