

Renowned Regenerative Agriculture Expert David Blume to Headline With Keynote at Gulfood Green World Forum

David Blume, the world's top regenerative agriculture expert with over 40 years of experience to keynote at the prestigious Gulfood Green World Forum in Dubai.

WATSONVILLE, CA, UNITED STATES, September 10, 2024 /EINPresswire.com/ -- [David Blume](#), a trailblazer in regenerative agriculture with over 40 years of experience, is set to take the stage as the keynote speaker at the prestigious Gulfood Green World Forum. The event, known for bringing together global leaders in sustainable agriculture, will be held in Dubai at the world forum on regenerative agriculture at <https://www.gulfoodgreen.com/> on September 25th.

With a background rooted in ecological biology and a passion for sustainable farming practices, David Blume has become a leading voice in the field of regenerative agriculture. His journey began in the heart of San Francisco, where he cultivated organic produce with his father, laying the foundation for his lifelong commitment to environmental stewardship.

Attendees of the Gulfood Green World Forum can expect to be inspired and educated by David Blume's wealth of knowledge and innovative approach to farming. Through engaging storytelling and practical insights, he will share his expertise on transforming traditional agricultural methods into sustainable and profitable practices.

Keynote Address - So, You Want A Revolution? Regeneration for Increased Profit
Date: 25 Sep 2024

David Blume

David Blume

Time: 12:10 - 12:40

Venue: Za'abeel Hall 3

Key Points of the Keynote Address:

Small is beautiful – Harnessing small farmers to rapidly advance regeneration

Affordable green energy and refrigeration where there is no grid

Making dead zones an undeniable road to profit

Carbon Dioxide Aikido – Turning CO2 into a feature not a bug

Feed your enemies and House your friends, a new paradigm for pest control

New systems for routinely generating 4X the yield of high value crops

Profitable organic fertilizer production in an era of high-priced shortages

Engineered biofilters - producing compliant wastewater, high value plant protein and solid green coal replacement

New technologies to increase yield 9X in well-designed greenhouse operations

Lowering the cost of desalination

Rolling back deserts permanently to restore agricultural industry rapidly

Don't miss this opportunity to hear from one of the foremost experts in regenerative agriculture. Join David Blume at the Gulfood Green World Forum and discover how sustainable farming practices can shape the future of agriculture.
