

Digital Hands Named a 2024 Best Workplace for Innovators by Fast Company

Digital Hands Earns Recognition in the Mid-Sized Companies Category for Continued Innovation in Workplace Culture and Employee Empowerment

TAMPA, FL, UNITED STATES, September 11, 2024 /EINPresswire.com/ -- Digital Hands is proud to

“

By giving our employees the tools and support they need to experiment and grow, they are empowered to bring fresh ideas to the table and solve complex cybersecurity challenges.”

Beth Brady, Senior Director of Human Resources at Digital Hands

announce that they have been named to Fast Company's sixth annual Best Workplaces for Innovators list, which honors organizations demonstrating a strong commitment to fostering innovation at all levels. This recognition highlights Digital Hands' dedication to creating a culture that empowers employees to push boundaries and drive meaningful change within the cybersecurity industry.

“Innovation is a global priority that cuts across all industries, and this year’s list reflects that diversity,” says Brendan Vaughan, editor in chief of Fast Company. The 2024 Best Workplaces for Innovators list ranks 100 winners from a variety of industries, including entertainment,

biotech, consumer packaged goods, marketing, education, healthcare, and many more. To earn Best Workplaces for Innovators recognition, all of this year’s winners (as well as dozens of additional finalists that appear online) completed an application that addressed questions about projects, investment, companywide programs, and workplace culture. Fast Company editors evaluated every application and conducted additional research to generate a score for each company. A separate judging panel then reviewed the top 125 companies to reach a consensus on the overall winner. Applications for specific categories were judged solely by Fast Company editors.

“Our success in fostering innovation starts with our investment in our people,” said Beth Brady, Senior Director of Human Resources at Digital Hands. “By giving our employees the tools and support they need to experiment and grow, they are empowered to bring fresh ideas to the table and solve complex cybersecurity challenges. This recognition by Fast Company reflects the incredible dedication of our team to push the boundaries of what’s possible and make a real impact.”

This recognition comes on the heels of Digital Hands winning three Stevie® Awards for Great Employers, along with the introduction of pivotal services that equip organizations to baseline their cybersecurity posture and build lasting resilience. Key among these is the [Breach and Attack Simulation \(BAS\) service](#), which safely simulates real-world cyberattacks in customer environments, enabling organizations to pinpoint vulnerabilities before they can be exploited. Additionally, the [vCISO service](#) provides strategic cybersecurity leadership, offering tailored guidance to organizations—whether they have a full-time CISO or not—by helping them enhance their security strategy and resilience.

These innovations stem from a workplace culture where every employee is encouraged to bring their expertise and creativity to the table. By fostering an environment built on collaboration and continuous improvement, Digital Hands ensures that clients receive cutting-edge solutions that offer peace of mind in today's rapidly evolving threat landscape.
