

The Latest Construction Innovations and Industry Insights - September 11, 2024

Peer-to-peer digital content sharing for construction and building professionals

SUNDRE, ALBERTA, CANADA,
September 11, 2024 /

EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

This week's featured video, courtesy of PCL Construction, highlights how their drone technology is transforming construction workflows and accuracy. From marketing to quality control, drone imaging enhances client projects in various ways. For example, the Town of Canmore used detailed drone imaging for grant reports on the Canmore Fire Station, while the Wilder Institute/Calgary Zoo's Archibald Biodiversity Centre saw increased efficiency by using drones to document key infrastructure.

Featured content includes a range of topical subjects:
