

Dr. Simon Ourian Reviews Aesthetic Laser Treatments

Dr. Simon Ourian reviews the latest in aesthetic laser treatments, and the growing use of lasers for full-body rejuvenation.

BEVERLY HILLS, CA, UNITED STATES, September 17, 2024 /EINPresswire.com/ -- Dr. Simon Ourian, one of the most sought-after cosmetic dermatology experts and founder of [Epione](#) Beverly Hills, shares his thoughts on the latest breakthroughs in aesthetic laser treatments. Known for treating some of the world's most famous faces, Dr. Ourian has been using cutting-edge laser technology to help his clients achieve glowing, youthful skin without the downtime of traditional surgery.

Lasers: The Future of Skincare

Laser treatments have made huge strides in recent years, and Dr. Ourian has seen firsthand how these innovations are transforming the aesthetics industry. "Lasers have become a cornerstone of what we do," says Dr. Ourian. "Whether it's for skin resurfacing, tightening, or addressing pigmentation issues, lasers provide effective results without the invasiveness of surgery."

“

Lasers are transforming skincare, offering remarkable results without surgery or downtime”

Dr. Simon Ourian

Dr. Simon Ourian, M.D., Cosmetic Dermatology expert and founder of Epione Beverly Hills

Dr. Ourian's Coolaser™ treatment, in particular, has been a game-changer. Designed to tackle everything from fine lines to acne scars, Coolaser™ offers clients the benefits of skin rejuvenation with minimal recovery time. "My patients love Coolaser™ because it delivers real results quickly," Dr. Ourian explains. "For people with busy lives or public-facing careers, it's a great option."

Customized Care for All Skin Types

One of the most exciting advancements, according to Dr. Ourian, is that today's laser treatments can be tailored to suit every skin type. "In the past, certain lasers weren't always safe for darker skin tones, but technology has come so far that we can now customize treatments for everyone," he shares. "It's really opened the door for a much broader range of people to benefit from these treatments."

Beyond the Face: Full-Body Laser Treatments

Dr. Ourian also notes that laser technology is no longer limited to the face. From reducing stretch marks and scars to tightening skin on various parts of the body, lasers have become a go-to solution for full-body treatments. "The versatility of lasers today is incredible," says Dr. Ourian. "We can address concerns on almost any part of the body, which gives patients more options than ever before."

Looking Ahead: The Future of Laser Aesthetics

As laser treatments continue to evolve, Dr. Ourian believes they will only grow more popular. "We're just scratching the surface of what lasers can do," he says. "The results we're seeing now are amazing, but I'm excited to see where the technology goes in the next few years."

For anyone interested in exploring laser treatments, Dr. Ourian and his team at Epione Beverly Hills offer customized consultations and cutting-edge procedures to help clients achieve their aesthetic goals.
