

## U.S. Commercial Drones Market is likely to expand US\$ 3,755 million at 15.8% CAGR by 2030

Advancements in technological and surge in demand for location-based services fuel the U.S. commercial drones market.

WILMINGTON, NEW CASTLE, DE, UNITED STATES, September 12, 2024 /EINPresswire.com/ -- The <u>\[ \] . \[ \] .</u> offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario. Aircrafts that have the capability to fly autonomously with the

help of an embedded program or which can be remotely operated from ground by a pilot are called as drones. Commercial drones are unmanned aerial aircrafts that are designed for commercial applications such as risk mitigation, resource planning, research & excavation, urban planning, engineering, farming management, tourism, aerial imaging, LiDAR applications, cargo management, weather monitoring, traffic control, green mapping, and others. These applications are utilized by several sectors such as agriculture and environment, media & entertainment, energy, government, and others, as business solutions.

The <u>U.S. commercial drones market size</u> has been segmented on the basis of type, application and function. By type, the market has been segmented into fixed wing drones, rotary blade drones and hybrid drones. By application, the market has been segmented into agriculture & environment, media & entertainment, energy, government, construction & archaeology and others. By function, the market has been segmented into connectivity, services and solutions.

The key companies operating in the industry have carried out numerous developments, which has created ample opportunities for the growth of the market across the country. In addition, continuous demand for aerial view at locations out of human reach has also fueled the growth of the market across the U.S.

Based on function, the solutions segment contributed to the highest share in 2020, accounting for more than two-fifths of the total market share, and is projected to continue its leadership status by 2030. However, the connectivity segment is expected to portray the largest CAGR of 16.9% during the forecast period.
