□□□□□□ □□□□□□□□□□:

Omega 3 fatty acids are polyunsaturated fats that perform important functions in the body. The body can't produce the required amount of omega 3 needed for survival. As such, omega 3 fatty acids are essential nutrients that individuals need to get from foods and supplements. Krill oil, fish oil, and algal oil are rich sources of omega 3 fatty acids such as DHA and EPA. Besides, edibles such as walnuts, pumpkin seeds, and squid have high levels of omega 3 fatty acids.

Omega 3 fatty acids ensure that the cells in the body function as they should. They are an important part of the cell membranes and provide structure and supporting interaction between cells. Also, these fatty acids provide the body with energy and support the health of several body systems, including the endocrine system and the cardiovascular system. The rising demand for omega 3 fatty acids across sectors such as nutraceuticals, pharmaceuticals and dietary supplements is boosting the omega 3 market growth.

Omega 3 is being widely used in pharmaceuticals owing to its ability to reduce the risk of abnormal heartbeats, lower triglyceride levels, and reduce blood pressure.”

Polaris Market Research

Key highlights:

- The omega 3 market is poised to register a robust CAGR of 7.6% during the forecast period, reaching USD 4,459.28 million by 2032.
- The trend of consuming functional and fortified food products to meet specific health needs has led to increased incorporation of omega 3 into these food items.

- The market segmentation is primarily based on type, source, application, and region.
- The study provides market insights into North America, Europe, Asia Pacific, Latin America, and the Middle East and Africa.

Key players:

The omega 3 market has presence of several established players. Manufacturing locally is one of the key business tactics adopted by several market participants to benefit clients and increase their market share.

Key players include:

- AKER BIOMARINE
- BASF SE
- Croda International Plc
- Corbion
- Cargill Inc.
- DSM-Firmenich AG
- GC Rieber
- Nuseed Global
- Omega Protein Corporation
- Pelagia Holding AS

For more information, visit our website:

- **Expanding End-Use Applications:** The rising applications of omega 3 fatty acids across various end-use sectors is the primary factor driving the omega 3 market sales. These fatty acids are being increasingly used in the pharmaceutical and nutraceutical sectors, as well as the food and beverages and animal feed industries.
- **Growing Use in Cosmetics and Personal Care:** The growing use of omega 3 in cosmetics and personal care products is significantly boosting the market demand. Omega 3 fatty acids are being increasingly used in skincare and haircare formulations owing to their anti-inflammatory and skin-nourishing properties.
- **Innovations in Extraction Methods:** Innovations in extraction methods, which include supercritical CO2 extraction and enzymatic processes, have led to enhanced purity and environmental safety of omega 3 production. These technologies possess greater bioavailability and also reduce the overall production costs.

Regional Market Insights:

- **North America:** North America accounted for the largest omega 3 market share in 2023. The region's growth is primarily fueled by the rising consumer awareness about the various health benefits associated with omega 3. Besides, the increasing incorporation of omega 3 in various foods and dietary supplements further supports the regional market expansion.
- **Asia Pacific:** Asia Pacific is anticipated to register the fastest CAGR from 2024 to 2032. This can be attributed to the rising emphasis on preventive healthcare and the introduction of new omega 3 products in the region.

Market Research Report:
