

Silver Wings by Two Square Meters Smart Home Technology Wins Silver in A' Lighting Products and Fixtures Design Award

*Innovative Children's Desk Lamp
Recognized for Its Eye-Protective Design
and Advanced Features*

COMO, CO, ITALY, September 15, 2024 /EINPresswire.com/ -- The A' Design Award, one of the world's most prestigious and highly respected [design competitions](#), has announced that Silver Wings, a children's desk lamp designed by [Two Square Meters Smart Home Technology](#), has been awarded the Silver A' Design Award in the [Lighting](#) Products and Fixtures Design category. This recognition highlights the lamp's exceptional design, which combines eye protection, advanced functionality, and aesthetic appeal.

Silver Wings

The Silver Wings desk lamp addresses a critical issue in children's eye health, as the myopia rate among children in China reached 53.6% in 2022. By providing a long, curved light source that evenly illuminates a 1.6m desk width and features foldable light wings to reduce hand shadows, the lamp enhances eye comfort and minimizes fatigue during extended study sessions. This innovative design aligns with the growing need for effective eye protection solutions in the lighting industry.

The lamp's unique features set it apart from traditional desk lamps. The rotatable double arc light source, a new lighting structure invented by Two Square Meters Smart Home Technology, ensures uniform and comfortable illumination by dispersing light in multiple directions. The lamp also incorporates a control method that combines rotation and screen touch, providing distinct feedback for each operation. Additionally, practical study aids such as timers and clocks are included to enhance children's learning efficiency.

Winning the Silver A' Design Award in the Lighting Products and Fixtures Design category serves as a testament to Two Square Meters Smart Home Technology's commitment to innovation and user-centric design. This recognition is expected to inspire the company to continue pushing the boundaries of lighting design, focusing on creating products that prioritize eye health, functionality, and aesthetics. The award also highlights the importance of addressing the specific needs of children in the lighting industry.

Silver Wings was designed by a talented team at Two Square Meters Smart Home Technology, including Bai Xiangyu, Fei Panyan, Wang Lei, Zou Yongfei, and Yang Ruixue. Their expertise and dedication to creating a lamp that combines eye protection, innovative features, and an appealing design have been instrumental in the product's success.
