The vehicle-to-grid (V2G) market is segmented on the basis of technology, charging type, vehicle type, component, and region. By technology, it is bifurcated into power management, and software. By charging type, it is fragmented into unidirectional charging, and bidirectional charging. By vehicle type, it is divided into battery electric vehicles, plug in hybrid electric vehicles, and fuel cell vehicles (FCVs). By component, it is classified into integrated electric vehicle supply equipment (EVSE), smart meters, home energy management (HEM), and others. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on vehicle type, the plug in hybrid electric vehicles segment held the dominating market share in 2021, holding more than half of the global market, and is expected to maintain its leadership status during the forecast period. The battery electric vehicles segment, on the other hand, is expected to cite the fastest CAGR of 27.3% during the forecast period.
