

Ophthalmic Devices Market is Forecast to Reach USD 69.2 Billion by 2031 from USD 44.3 Billion in 2022 | Astute Analytica

CHICAGO, CA, UNITED STATES, September 16, 2024 /EINPresswire.com/ -- The global ophthalmic devices market is projected to experience significant growth, with its market value expected to rise from USD 44.3 billion in 2022 to USD 69.2 billion by 2031. This robust expansion, at a compound annual growth rate (CAGR) of 4.0% from 2022 to 2031, is driven by advancements in ophthalmic technology, an aging population, and increasing cases of vision-related disorders such as cataracts, glaucoma, and macular degeneration.

Ophthalmic devices, which include diagnostic, surgical, and vision correction instruments, are seeing growing demand globally as healthcare providers increasingly focus on improving eye care services and outcomes. Innovations in minimally invasive surgeries and the development of advanced diagnostic tools are further propelling the market. In addition, rising awareness about the importance of routine eye check-ups, coupled with government initiatives to combat preventable blindness, are expected to contribute to market growth.

Key market players are focusing on research and development to launch cutting-edge products, while partnerships, mergers, and acquisitions are fostering a competitive landscape. As the global population ages and the prevalence of chronic eye conditions increases, the ophthalmic devices market is poised to play a crucial role in enhancing the quality of eye care worldwide.
