## Growth Driver Of The Apparel Resale Market

The growing e-commerce platforms are expected to propel the growth of the apparel resale market going forward. E-commerce platforms are online systems that enable businesses and individuals to buy and sell goods and services over the Internet, providing tools for transaction management, inventory control, and customer engagement. The growth of e-commerce platforms is due to the growing adoption of online shopping, advancements in digital technology, and the expanding reach of Internet access. E-commerce platforms provide a global reach, allowing sellers to access a wider audience beyond their local geographic area. This increased visibility enables resale items to reach buyers needing access to physical resale stores.
