Additionally, for another global chemical manufacturing company, Kellton's platform enables automated formula balancing, based on ingredient changes; and helps provide cost price & selling price projections for manufacturing at scale, substantially improving their decision-making process.

"Kellton's low-code platform streamlines data management and automation for enterprises, enhancing efficiency and enabling easy digital transformation with powerful tools and user-friendly features." said the jury.

Krishna Chintam, Global CEO, Kellton, commented on the win: "Our Hyperautomation platform was first introduced to support smaller businesses in automating and streamlining their processes.
